## SUMMARY

A passionate **Full-stack web developer**, skilled in building **end-to-end full-stack website and web apps**. Strong information technology professional with a Bachelor of Technology - Bharati Vidyapeeth college of Engineering, Pune

## EXPERIENCE

### Summer Intern

IIIT Allahabad

April 2022 - November 2023, Allahabad

- Developed a full-stack Windows application leveraging **Electron.js** within a two-person team under the guidance of Prof. Anupam Agarwal.
- Handle large student datasets. Improved the speed of data analysis operations by 40%, Increase resulting in overall efficiency and reliability of the software.
- **Tech Stack: Front-End: JavaScript, Electron.js | Back-End: Node.js Express | Database: MongoDB with Mongoose.**

### Front-End Developer

CORD.AI

July 2023 - August 2023, Pune, Remote

- CORD.ai is community for AI/ML enthusiasts. As a front-end developer, I worked on the old website and made a new UI for the community's website using **Adobe XD**.
- Implementing timely content updates and collaborating with the design team to enhance the website's layout and appearance.
- **Tech Stack: HTML5, CSS3, Sass, JavaScript, GitHub, Git**
- **Design Tool: Adobe XD, Figma**

## EDUCATION

### B. Tech in Information Technology

Bharati Vidyapeeth Deemed University College of Engineering, Pune • Maharashtra • 2024 • Till Sem 5- **9.04** CGPA

### 12th HSC

Science PCM • Narayana Vidyalayam, • Chandrapur, Maharashtra • 2020 • **63.8%**

### 10th Matriculation

Narayan Vidyalayam • Chandrapur, Maharashtra • 2018 • **79%**

## SKILLS

**Software: Web Development, JavaScript, Html, CSS, Bootstrap, Nodejs Express, MongoDB, Database, MySQL, Mongoose, GitHub, Git, Sass, React.js, Data structures and algorithms in Java**

## PROJECTS

### Student Database Manager

• January 2021 - February 2021

- Student database manager is a cross platform desktop application that helps you manage the Information or data of students in a specific institution (college or school).

**Tech Stack:** HTML, CSS, JavaScript, Electron.js, Back-end: Node.js, Express,

**Databases:** MongoDB, Mongoose for seamless connection between database and server.

### React Note App

• April 2023 - May 2023

- This is a React Note App. Like every note app you can add notes and when not required can delete them too. This is a minor project under software testing subject that I did in my 6<sup>th</sup> semester under Prof. Rohini Jadhav.

• **Tech Stack:** React.js, Selenium for Automated testing.

### Personal Portfolio Website.

• January 2022 - February 2022

- Showcasing my skills, projects, and achievements through my personal portfolio website.

## CERTIFICATIONS

### The Complete 2023 Web Development Bootcamp

Udemy • 2022

Took it in my freshman year, a course by Angila Yu, that helped me learn the fundamentals of Full stack Web Development.

### Data Structures

Walchand College of Engineering • 2021

Took in my 3<sup>rd</sup> semester of college. The course helped me to understand the fundamentals of Data Structures and Algorithms.

### Introduction to Structured Query Language (SQL)

Coursera • 2021

Took it in my 4<sup>th</sup> semester of college. A SQL database course that helped me understand the concepts of database schema, joins and RDBMS.

### The Complete JavaScript Course 2023: From Zero to Expert!

Udemy • 2023

The course helped me have a deeper Understanding of JavaScript. Topics like functions arrays, data structures, asynchronous js, OOP were covered along with hands-on projects.
